Unscramble the letters to find the hidden inventor or invention. Next, write the letters above the numbers in the answer on the corresponding numbered lines below to reveal a famous quote by the inventor Thomas Edison. The first one has been done for you.

Inventors & Inventions Game

Working from his lab in Menlo Park, New Jersey, Thomas Edison was a brilliant inventor whose inventions which included the telegraph, phonograph, the motion picture camera and a long-lasting, electrical light bulb among others, changed how we live. It is believed Edison said the above quote when asked about his work on the electric light bulb which took years to invent.

Challenge Question: On the back of the page, explain Edison’s quote. Did Edison believe mistakes are good? bad? Can we learn from mistakes?
